

Device is not operating with TX on LTE B7 in US Market

Model Name : SM-W727V, SM-W728, SM-W627

2017.1.30

1. **UE does not operate with LTE B7 in United States live network if there's no LTE B7 service.**
2. **The right flow chart shows how UE operate on B7.**
3. **UE will check MCC from SIB(System Information Block) message which is broadcasted by network.**
4. **There's no any TX operation on B7 because UE just read this information from the broadcasting message.**
